[1] The UHS speed class, video speed class and application performance class of memory card products are measured via TestMatrix in compliance with guidelines and standards stipulated by SD Association.

[2] A part of the capacity of the memory product will be used for formatting or other functions, and the displayed capacity in the operating system will be less than the actual storage capacity due to unit conversion on different systems. Users are advised to calculate the actual storage capacity using this equation: total bytes/1024/1024/1024.

[3] Based on TEAMGROUP's internal testing, TEAMGROUP's advanced technology enables the product to deliver performance beyond the 104 MB/s transmission speed of UHS-1 specification interface. Users are advised to use professional card readers to ensure comprehensive performance.

※ Transmission speed will vary according to different hardware and software conditions. The data provided is for reference only.

[4] The format for optimal usage might vary on different devices. Users are advised to format the memory card before use on the device to ensure functional accuracy and integrity.

※ We reserve the right to modify product specifications without prior notice.

※ Refer to the latest version on the official website. In case of discrepancies, the official website prevails.
