

Product Highlights:

- 10.1 inch 1280 x 800 HD touchscreen
- Superior anti-glare screen for better clarity
- Perfect gift – invite friends and family to share photos and videos to each other's frames from anywhere
- Dual orientation to display portrait and landscape shots
- 32GB built-in storage holds up to 40,000 photos¹
- Supports SD cards and USB drives for expanded storage

Frame the Moments that Matter

Share photos and videos from anywhere – the terra frame gives your favorite memories the spotlight they deserve. Thoughtfully designed with an anti-glare, high-res, dual-orientation touchscreen, pexar combines style with a user-friendly experience, making the terra frame the perfect gift for any occasion. Powered by Lexar, a brand you can trust.

Anti-Glare Screen for Extraordinary Clarity. The 1280 x 800 HD resolution touchscreen serves up vibrant visuals on a stunning 10.1-inch display. Additionally, the anti-glare screen reduces distracting reflections from any angle while a sleek thin-bezel design with a detachable stand supports both portrait and landscape implementation.

Share Moments within Seconds. Simply plug it in,² connect to Wi-Fi, and invited contributors can use the free Frameo app (rated 4.9/5 on the App Store) to add photos and videos from their phone to the frame within seconds, privately and securely.

Multiple Ways to Easily Share Photos. Effortlessly share pictures and videos to your frame from your smartphone,³ USB flash drive,⁴ SD card, or computer. Compatible with both iOS and Android systems.

Private, Secure, Worry-Free Storage. With 32GB of built-in storage, the frame holds more than 40,000 600KB-photos and you can use an SD card or USB flash drive for even more storage.⁵ Also, our frame is GDPR, CCPA and PSTI compliant.

Keeps Family Close. Invite family and friends to share photos and videos and then tap the photos to react and send smiles back to them.

Smart and Useful. The frame boasts dual-orientation to display to both portrait and landscape shots and includes weather updates, a clock, and sleep mode. It also features a function that lets users turn a photo into a digital greeting card for special occasions and an album function for photo management.

pexar is a brand by Lexar, a leading memory technology innovator. pexar uses the latest in imaging, memory and storage technology to preserve and share all of life's best moments. Its first product line, the pexar digital picture frame, offers a new way for memories to flourish and inspire creativity.

¹Based on 40,000 photos of 600KB each.

²The frame needs to be connected to a power source for use. The product itself does not contain a battery.

³Photos and videos can be shared through the connected Frameo app without being in the same Wi-Fi environment as the frame. A Wi-Fi connection is required to upload photos and videos from your phone. Once uploaded, they can be viewed offline.

⁴USB-A port supports USB flash drives only; USB-C port supports USB-C data cables only for easy file transfers from your computer.

⁵Expandable storage requires an SD card or a USB Flash Drive, sold separately.

Lexar is not liable for any loss of data or images.
