

# USB™ HD Webcam with 360° rotation

JVCU100

macOS® / Windows® / Chrome OS™ Compatible

High Definition

Hardware Acceleration

Tripod-ready Clip

Security Camera Image Sensor

Low Light Enhancement

With the JVCU100, you can enhance your conference calls with live video and audio. The HD camera is plug-and-play, meaning there is no driver installation required. The JVCU100 supports 1080p video playback @ 30 Hz with H.264 streaming format.

## 1080P at 30 FPS (Frames Per Second)

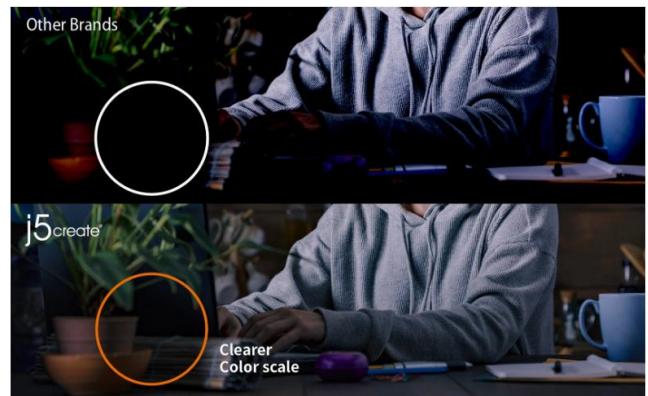

High definition 1080p video quality at 30 FPS gives you the ability to capture all the subtle details of movements, expressions, and more.

**Low Light Enhancement**  
F/2.4 aperture lens and security camera image sensor with enhanced light sensitivity gives you the ability to capture more light and higher clarity images, making it ideal for better low light capture and blurless movement.

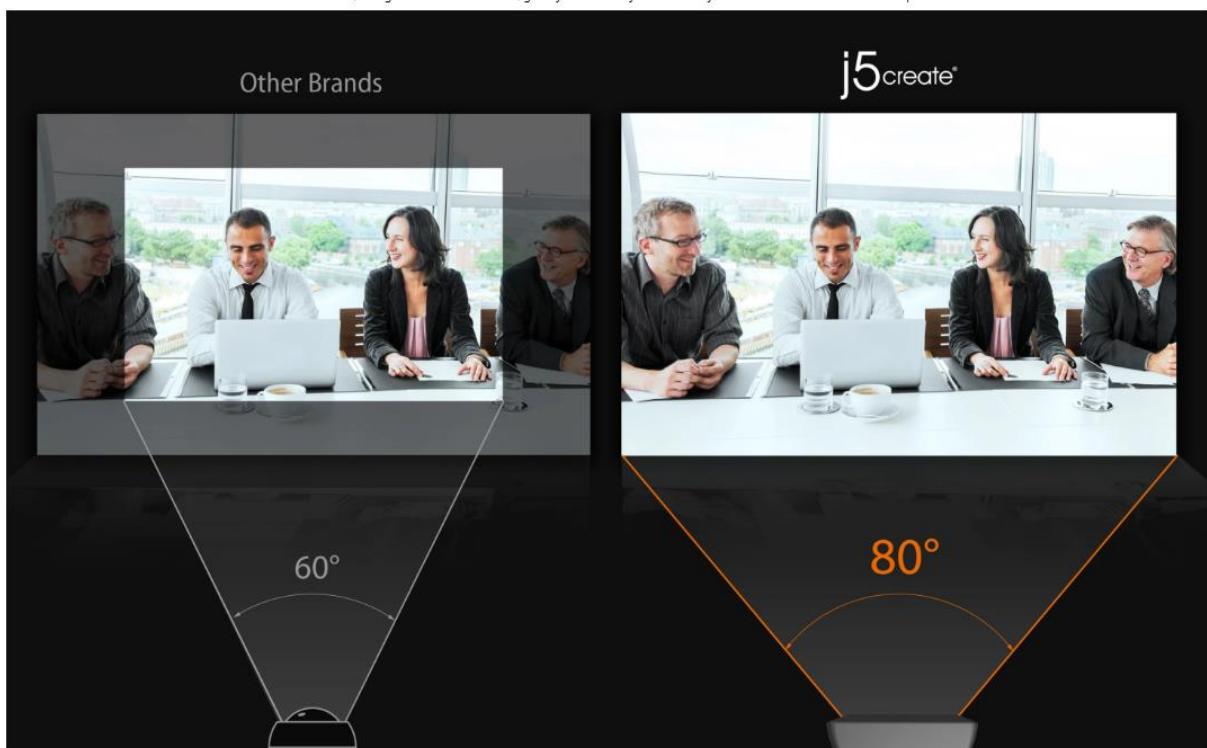

### Brighter and More Vivid Images

The low light enhancement feature automatically adjusts the brightness and color scales to accommodate low-light environments.

### Designed for Team Collaboration

80° field of view, along with the 360° rotation, gives you the ability and flexibility to see more and fit more into the picture.

### Built-in High Fidelity Microphone

Greatly reduces power and environmental noises.

360° Rotation

Standard UVC/UAC Protocol

Plug-and-Play

#### Built-in High Fidelity Microphone

Greatly reduces power and environmental noises.

#### H.264 | MPEG-4 AVC (Advanced Video Coding)

H.264 video compression provides Blu-Ray™-quality video at considerably lower bit rates, which saves significant disk space while capturing videos
